July 20 - Monthly Dinner Meeting Riot Games, Los Angeles

Risk Leadership

Essential Leadership Lessons for 21st Century IT and InfoSec Leaders

In today's world, change leadership is critical for organizations to align, execute, and renew themselves faster than the competition.

Presenter:

Malcolm Harkins

Global Chief Information Security Officer for Cylance, Inc.

Ever wonder how to create lasting commitment from your employees and for yourself? How to get your teams to stay engaged battling thru the challenges we see day in and day out. In this talk, I will explore how logic leads to reason and how emotion leads to action. I will go through my personal journey exploring both the cycle of risk and sharing lessons from my +25 years managing people and leading teams. I will explore what gifted strategic thinkers do as well as what gifted curators of commitment do to inspire purpose, passion, and persistence to achieve hard but worthy goals. I will cover the laws of leadership and my 9 box of controls that should guide our approach to overcome the challenges we face. The summary will be the 21 items I have learned through my time as a risk and security leader.

This is a joint meeting with ISSA-LA

We work to find the best possible avenues for promotion, whether the goal is awareness of a new line of products, continuing the growth of an existing business or building brand recognition in preparation for a potential acquisition. Learn more at: <http://milldampr.com/>

Note: Originally the meeting was scheduled as: **Lessons from a quarter of a billion breached records.** " with Troy Hunt, but the speaker could not make the meeting, original flyer text listed below:

What motivates attackers to dump data publicly? How is it sold, traded and redistributed and for that matter, what even causes adversaries to go public with it? These are all questions I've dealt with over the years running the ethical data breach search service "Have I been pwned". It's also given me the opportunity to interact with everyone from the attackers breaching these systems to the impacted organisations to law enforcement agencies. In this talk, I'll share the lessons learned from working with more than a quarter of a billion publicly dumped records as a result of major data breaches. The talk sheds light on how this class of adversary operates and the weaknesses within organisations they continually manage to exploit. It's a unique inside look at security from a very real world and very actionable perspective.

Presenter:

Troy Hunt

Microsoft Regional Director

Troy is a Pluralsight author, Microsoft Regional Director, MVP and world-renowned internet security specialist. He spends his time teaching developers how to break into their own systems before helping to piece them back together to be secure against today's online threats. He's also the creator of "Have I been pwned", the free online service for breach monitoring and notifications. Troy regularly blogs at troyhunt.com from his home in Australia.
